

# VACCINATION MYTHS AND FACTS COVID-19

Learn more about the COVID-19 vaccine here:  
[sedgwickcounty.org/covid-19/vaccine](https://sedgwickcounty.org/covid-19/vaccine)

## MYTH:

The vaccine testing *was rushed*.

The vaccine is *not safe*.

It *will change* my DNA.

Getting the vaccine can *give me* COVID-19.

It *contains* egg proteins.

It *causes serious* side effects.

It will *cause infertility*.

## FACT:

Medical experts have performed the necessary studies in tens of thousands of participants showing the vaccines to be safe and effective.

A system is in place for doctors and the public to report any adverse effects. Medical experts are constantly reviewing reports to ensure safety.

According to the CDC, COVID-19 vaccines do not affect or interact with our DNA in any way.

The vaccine does not contain any live virus and cannot give you COVID-19.

There are no egg proteins and the vaccine can be given to people with allergies.

Most side effects are mild and are gone within a few days.

There is no evidence that the COVID-19 vaccine causes infertility.

If you have more questions about the COVID-19 vaccine, call your medical provider, community health clinic, or Sedgwick County Health Department at (316) 660-1022.

**PLEASE HELP PREVENT THE SPREAD OF COVID-19**
